

Themes

Our product offers three distinct themes to accommodate various user preferences and needs. Each theme provides a unique visual experience, allowing users to customize their interface according to their preferences.

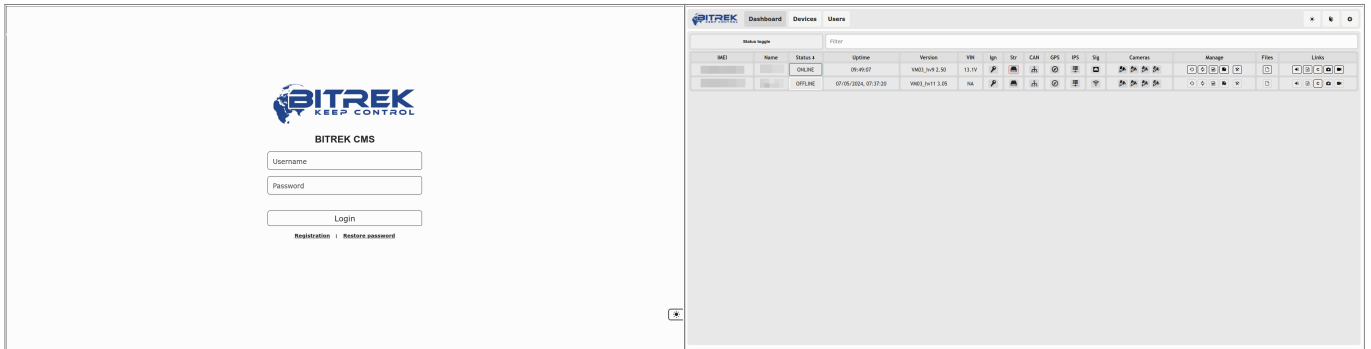

Switching Themes

The themes seamlessly transition in a loop, and it's worth noting that changing themes does not require a page reload. Users can effortlessly switch between themes according to their preferences and needs. This process is straightforward and can be initiated by simply clicking the theme change button.

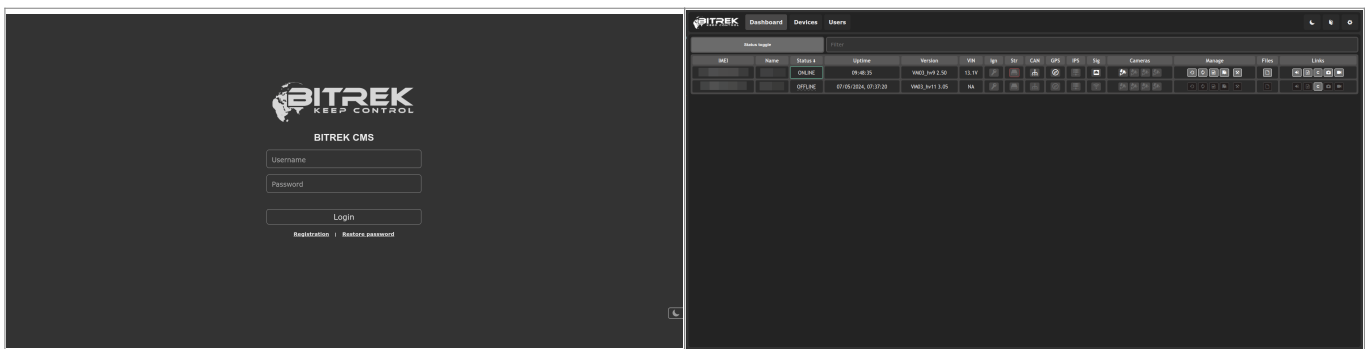

Themes Overview

1. White Theme

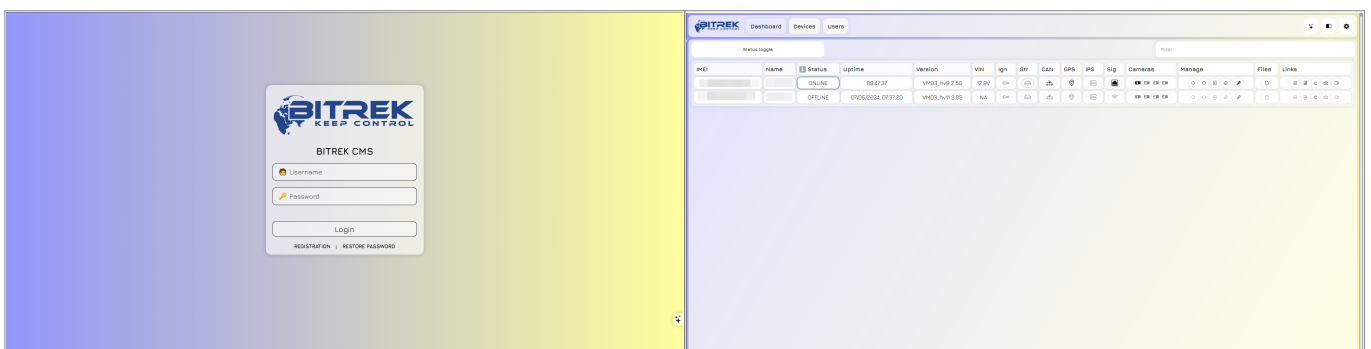

The White Theme features a clean and minimalist design, emphasizing simplicity and clarity. It utilizes a bright background with contrasting text and elements, ensuring readability and a professional appearance.

2. Dark Theme

The Dark Theme presents a sleek and stylish appearance with dark backgrounds and light text. It caters to users who prefer reduced eye strain and a modern aesthetic, particularly suitable for low-light environments.

3. Modern Theme (Newly Added)

The Modern Theme, introduced in the latest update, features a blurry transparent white design, offering a unique visual experience.

We drew inspiration from the visual appearance of the 'Diia' service when creating the new theme
