

How do I enable Timelapse mode?

First, you need to connect the cameras to the device

After that, you need to go to [device configuration menu](#), go to the tab **Cameras/Timelapse/Video**
Timelapse (content 3)

Time-lapse video (content 3) ☰

Camera 1

State Disabled	Amount of photos (2..999) 10	Photos interval (10..9999s) 10	FPS (1..25) 1	RTSP source LOW
-------------------	---------------------------------	-----------------------------------	------------------	--------------------

Camera 2

State Disabled	Amount of photos (2..999) 10	Photos interval (10..9999s) 10	FPS (1..25) 1	RTSP source LOW
-------------------	---------------------------------	-----------------------------------	------------------	--------------------

Camera 3

State Disabled	Amount of photos (2..999) 10	Photos interval (10..9999s) 10	FPS (1..25) 1	RTSP source LOW
-------------------	---------------------------------	-----------------------------------	------------------	--------------------

Camera 4

State Disabled	Amount of photos (2..999) 10	Photos interval (10..9999s) 10	FPS (1..25) 1	RTSP source LOW
-------------------	---------------------------------	-----------------------------------	------------------	--------------------

Here you can configure the creation of a timelapse , setting parameters such as the number of photos the camera will take in the timelapse and the time interval between them, the frame rate per second that will be played back and the video quality
