

# How do I connect to the device as an access point?

First you need to connect the WiFi module to your device

After that, you need to go to device configuration menu, and go to the **Network/WiFi** tab and select \* \*AP (access point) **mode**.

**WiFi configuration** ▢

WiFi mode  
AP (Hotspot)

---

**AP configuration** ▢

Hotspot SSID  
NVR\_867648041547447

Hotspot password  
\*\*\*\*\*

Here you will be able to configure SSID **of your device and set** access point password\*\*

Done! After that you will be able to connect to it from any device with WiFi
